Eclipses Sepharial (1864-1929) had a life-long dislike of luck. He challenged himself to find what he called "scientific rules" that would eliminate chance. And, according to his own accounts, he succeed. In Law of Values, he suggests buying stocks immediately after they have been clobbered by Saturn, with the price as low as it will get, and then selling the stock immediately after being hit by Jupiter, when the price is likely to be as high as it will ever go. And living off dividends between the two. In The Silver Key, a book on horse-racing, Sepharial examines, and discards, conventional numerology, colours and symbols, in favor of a method based on the Moon, weights and tides. His results are impressive. The Arcana, or Stock and Share Key, was one of a number of secret financial manuscripts which Sepharial sold by subscription only. In it, you will discover the secret to using the Meridian in day trading. Sepharial also gives instructions for using dispositors and decans. This is first time the Arcana has appeared in print. Astrologers looking to improve their techniques, as well as investors looking to improve their portfolios, will find these books of interest.

Abraham Ibn Ezra on Elections, Interrogations, and Medical Astrology

The World of Renaissance Italy: A Daily Life Encyclopedia [2 volumes]

The Publishers' Trade List Annual "In my years of practice as a physician, I have, by the use of Astrology, been able to very quickly locate the seat of the disease, the cause of the trouble, the time when the patient began to feel uncomfortable, as based on the birth data of the patient, and this without even touching or examining the patient, and my intense desire to get this knowledge and wisdom before students and Healers in a classified form, is the reason for this Encyclopaedia. . . . When once you have discovered the cause of the disease, and understand its philosophy and the relation of the patient to the great Scheme of Nature, the matter of treatment I leave to you, and according to the System and Methods you may be using." (pg. 502) This is not only the best book ever written on medical astrology, it is also the best medieval medical reference ever put in print. This book excels in diagnosis, in other words, if the symptom is X, then the astrological cause is Y. Which becomes the key to reading the patient's chart, or his decumbiture. Cornell writes in traditional language. The same language, in fact, as you will find in Culpeper, Saunders, Lilly, Blagrave and many others. This book is the key that will open these and many more. Howard Leslie Cornell, M.D., (1872-1938) was a naturopathic physician with a practice in the US and India. In 1918 he set about to compile the medical references in his many astrology books. As he himself wrote, it became a momentous task, eventually comprising two large ledgers. These were then arranged, classified, disentangled and wrote into readable form. Only at that point did he consider making a proper book of it, and set about retyping and rearranging yet again. The result of 15 years work was published in 1933. It has been in print, off and on, ever since. It remains the one indispensable medical astrology book. The Encyclopaedia of Medical Astrology repays close study. A page-by-page reading is most rewarding.

T&T Clark Encyclopedia of Second Temple Judaism Volume Two Includes tables of planetary hours, star charts and more, Simplified Scientific Astrology teaches readers how to read the stars and construct horoscopes using celestial diagrams. A horoscope is an astrological diagram representing the positions of the sun, moon, planets, astrological aspects and sensitive angles at the time of an event, such as the day of a person's birth. While many believe a horoscope is a small blurb you read in the Sunday newspaper, the art of drafting horoscopes involves tedious stargazing and map making.

Conversations with Nostradamus: Volume 2

The Complete Guide to Astrological Self-Care The Biographical Encyclopedia of Astronomers is a unique and valuable resource for historians and astronomers alike. The two volumes include approximately 1550 biographical sketches on astronomers from antiquity to modern times. It is the collective work of about 400 authors edited by an editorial board of 9 historians and astronomers, and provides additional details on the nature of an entry and some summary statistics on the content of entries. This new reference provides biographical information on astronomers and cosmologists by utilizing contemporary historical scholarship. Individual entries vary from 100 to 1500 words, including the likes of the superluminaries such as Newton and Einstein, as well as lesser-known astronomers like Galileo’s acolyte, Mario Guiducci. A comprehensive contributor index helps researchers to identify the authors of important scientific topics and treatises.
Female Patients in Early Modern Britain This volume, a directory of astrological correspondences, is the result of a research project that drew together the thoughts of many others into a reference book, assuming the role of a dictionary to astrologers, but vastly more complete. It is the only place where all sign, planetary and house rulerships have been brought together and put in a good workable order. It is organized in such a way that one can use the book for quick and easy reference, and it eliminates the need to search through various other volumes. In four parts: an alphabetical listing, a listing by planets, a listing by signs, a listing by houses. Plus an Appendix with special listings: principal bones of the body, principal veins of the body, chart of an organization, flavors and handwriting forms. Enthusiastically endorsed and used by professionals and students alike, no reference library is complete without this best-selling volume.

Biographical Encyclopedia of Astronomers The T&T Clark Encyclopedia of Second Temple Judaism provides a comprehensive reference resource of over 600 scholarly articles aimed at scholars and students interested in Judaism of the Second Temple Period. The two-volume work is split into four parts. Part One offers a prolegomenon for the contemporary study and appreciation of Second Temple Judaism, locating the discipline in relation to other relevant fields (such as Hebrew Bible, Rabbinics, Christian Origins). Beginning with a discussion of terminology, the discussion suggests ways the Second Temple period may be described, and concludes by noting areas of study that challenge our perception of ancient Judaism. Part Two presents an overview of respective contexts of the discipline set within the broad framework of historical chronology corresponding to a set of full-colour, custom-designed maps. With distinct attention to primary sources, the author traces the development of historical, social, political, and religious developments from the time period following the exile in the late 6th century B.C.E. through to the end of the Bar Kokhba revolt (135 C.E.). Part Three focuses specifically on a wide selection of primary-source literature of Second Temple Judaism, summarizing the content of key texts, and examining their similarities and differences with other texts of the period. Essays here include a brief introduction to the work and a summary of its contents, as well as examination of critical issues such as date, provenance, location, language(s), and interpretative matters. The early reception history of texts is also considered, and followed by a bibliography specific to that essay. Numerous high-resolution manuscript images are utilized to illustrate distinct features of the texts. Part Four addresses topics relevant to the Second Temple Period such as places, practices, historical figures, concepts, and subjects of scholarly discussion. These are often supplemented by images, maps, drawings, or diagrams, some of which appear here for the first time. Copiously illustrated, carefully researched and meticulously referenced, this resource provides a reliable, up-to-date and complete guide for those studying early Judaism in its literary and historical settings.

The Integrated Astrological Guide to Self-Empowerment Volume 1 This volume offers the first critical edition, with English translation and commentary, of seven astrological treatises by Abraham Ibn Ezra: the Book of Elections (3 versions); the Book of Interrogations (3 versions); and the Book of the Luminaries.

Encyclopaedia of Medical Astrology Subtitled, An Encyclopaedia of Character & Disease, Carter's classic book was the result of study of hundreds of horoscopes. Carter discovered that specific degrees of the zodiac produced specific results, including things like abscesses, goiter, poor vision, medical or musical ability, spinal curvature, asthma & much more. He also found astrological guidelines for traits such as boredom, love of animals, hay fever, rambling speech, epilepsy & many more. Sometimes known as Carter's Little Green Book. Always surprising, sometimes witty, this is one of the great books of the 20th century. Charles E.O. Carter (1887 - 1968) was one of the outstanding British astrologers of the 20th century. He succeeded Alan Leo as head of Astrological Lodge at the Theosophical Society, a post he held from 1920 to 1952. He was editor of Astrology, The Astrologer's Quarterly, from 1926 to 1959. Carter's persistent genius reestablished astrology as a serious discipline in England, after two centuries of decline.
